Whereas fisheries of the high seas annually generate hundreds of millions of dollars in economic activity and support thousands of jobs in the United States and

its territories as well as nations throughout the world;

Whereas the United Nations Food and Agriculture Organization reports that a growing number of high seas fish stocks important to the United States and the world are overfished or depleted;

Whereas the United Nations has called for urgent action to address the impact of high seas fishing practices that have adverse impacts on vulnerable marine species and habitats;

Whereas destructive, illegal, unreported, and unregulated fishing by vessels flying non-United States flags threatens high seas fisheries and the habitats that support them;

Whereas nations whose fleets conduct destructive, illegal, unreported, and unregulated high seas fishing enjoy an unfair competitive advantage over United States fishermen, who must comply with the rigorous conservation and management requirements of the Magnuson Stevens Fishery Conservation and Management Act and other laws in order to conserve exhaustible natural resources; and Whereas international cooperation is necessary to address destructive, illegal, unreported, and unregulated fishing which harms the sustainability of high seas living
